TAG FIELD = FONT SIZE	
The default field sizing is based	[input signer1]
on the size of the font.	
Advanced	[input signer1 larger field]
For `sign` type fields can use the	
suffix xs,sm,md,lr,xl to adjust	
the signature size relative to	
the font size.	
XREF fields	
if you only have a small space fo	or a [xa]
field and long tag would make a me	
use a 'xref' field. Any field that	[xb]
